

Automotive Brake Pad Set

This high-performance brake pad set provides optimal stopping power. It is manufactured with premium friction materials for consistent braking performance.

Product Overview

High-Performance Braking Solution

This automotive brake pad set is engineered to deliver superior stopping power and long-term durability. Utilizing premium friction materials, these pads ensure consistent performance across diverse driving environments. Designed to meet or exceed OEM specifications, they offer a reliable fit and enhanced heat dissipation for safety and longevity.

Quality Standards

OEM Equivalent • High-Performance

Technical Specifications

Key Features

- Optimal stopping power
- Premium friction material composition
- Robust backing plate design
- Enhanced heat dissipation
- Direct OEM fitment

Part Number

THD 242 7153
