Product Overview

High-Performance Automotive Brake Pads

These high-performance brake pads are engineered for optimal braking power, durability, and safety under extreme conditions. Featuring advanced ceramic and metallic formulations, they offer superior heat resistance and consistent performance. Designed for longevity and environmental compliance, these pads are a reliable choice for automotive aftermarket service and maintenance.

Technical Specifications

Max Heat Resistance

350 °C

Max Temperature

Part Identifiers

- D265
- WVA 29087

Service Life

35000 KM

Material Composition

Ceramic, Semi-metallic, Low-metallic, Non-asbestos

Quality & Compliance

Key Performance Features

High Temperature Resistant • Wear Resistant • Pollution-Free • Noise-Free • Stable Quality
