Product Overview

Automotive Brake Shoe 4515

The 4515 brake shoe is a critical component engineered for commercial vehicles and heavy-duty trucks. It features a robust steel backing plate designed for structural integrity and efficient heat dissipation, paired with a specialized friction material for optimal stopping power. Built for durability and safety, this component provides a precise fit and reliable, consistent performance under demanding driving conditions.

Certifications & Standards

Certifications

ISO/TS 16949:2002, ECE-R90

Technical Features

Key Features

- Robust steel backing plate
- Engineered for heat dissipation
- Weight reduction design
- Integrated mounting hardware
- Optimized brake force distribution

Application

Commercial vehicles and heavy-duty trucks
