

Automotive Cabin Air Filter

This cabin air filter provides high filtration performance. It effectively removes dust, pollen, and other airborne contaminants to ensure clean and fresh air inside the vehicle.

Product Overview

Clean Air for Every Drive

This high-performance cabin air filter is designed to protect passengers from pollutants, allergens, and exhaust gases found in traffic. By effectively trapping road dust, pollen, and particulate matter, it ensures a healthier cabin environment. Additionally, it helps maintain the efficiency of your vehicle's heating, ventilation, and air conditioning systems, potentially reducing long-term maintenance costs.

Filtration Technology

Filter Type

Activated Carbon • Particulate Filter

What it Filters

Road Dust, Pollen, Particulate Matter, Unpleasant Odors, Ozone, Sulphur Dioxide, Nitrogen Oxide

Performance Metrics

Airflow Capacity

540000 litres/hour

Max Airflow

Compatibility

OEM Reference

88568-52010

Vehicle Compatibility

Toyota
