

Automotive Cabin Air Filter

This high-efficiency cabin air filter is designed for automotive air conditioning systems. It effectively removes dust, pollen, and other contaminants from the vehicle's interior.

Product Overview

Premium Cabin Air Filtration

This automotive cabin air filter is designed to protect vehicle occupants from pollutants, allergens, and exhaust gases found in heavy traffic. Featuring an advanced activated carbon layer, it goes beyond basic particle filtration to eliminate unpleasant odors and adsorb harmful gases like Ozone, Nitrogen Oxide, and Sulphur Dioxide. Regular replacement helps maintain optimal HVAC system efficiency and ensures cleaner, healthier air inside the vehicle cabin.

Filtration Technology

Filtration Capabilities

- Road dust removal
- Pollen trapping
- Particulate matter filtration
- Odor elimination
- Harmful gas adsorption (Ozone, SO₂, NO_x)

Filter Type

Activated Carbon • High-Efficiency

Maintenance & Performance

Maintenance Benefits

- Reduces contamination of HVAC systems
- Minimizes wear-off of heating and cooling components
- Sustains vehicle efficiency
- Reduces overall maintenance costs

Specifications

Airflow Capacity

540000 litres/hour

Max Airflow

Compatibility

Compatible OEM Part Number

999M1-VP055
