

Automotive Cigarette Lighter Vacuum Pump

This vacuum pump is designed for efficient, reliable, and low-noise operation. It is suitable for applications in refrigeration, medicine, chemical processing, electronics, and metallurgy.

Product Overview

Professional Performance on the Go

This portable vacuum pump is specifically engineered for automotive maintenance and field service applications. Featuring a convenient DC 12V cigarette lighter power connection, it offers reliable operation for HVAC&R system evacuation and refrigerant handling. Its compact, lightweight design with an integrated handle ensures professional-grade portability in various industrial and automotive environments.

Technical Specifications

Performance Metrics

2 CFM

Free Air Displacement

150 Micron

Ultimate Vacuum

Power Requirements

12 V DC

Voltage

120 W

Power

Model Number

VPBD-2C

Physical Dimensions

Weight

5 kg

Dimensions

255x105x202mm

Oil Capacity

220 ml

Connection Details

Inlet Fitting

1/4" SAE

Applications

Suitable Industries

Refrigeration, Medicine, Chemical, Automotive, Metallurgy

Key Features

Equipment Highlights

- Low noise operation
- Efficient and reliable design
- Economic performance
- Integrated carrying handle
- Automotive cigarette lighter power connection
