

Automotive Clutch Assembly

This clutch assembly is designed for efficient power transfer in automotive applications. It features a robust construction with a durable friction plate and pressure plate, ensuring reliable performance and longevity.

Product Overview

High-Performance Clutch Assembly

This automotive clutch assembly is engineered for efficient power transfer and reliable performance in various vehicle applications. Featuring a robust construction with a durable friction plate and pressure plate, it is designed to withstand high torque loads while ensuring smooth engagement. Precision-engineered components minimize wear, making this assembly an ideal solution for both standard daily drivers and performance-oriented vehicles.

Technical Specifications

Performance Metrics

100 %

Torque Handling

Key Features

- Robust friction plate construction
- High-torque load capacity
- Smooth engagement mechanism
- Precision-engineered components

Vehicle Compatibility

Standard Vehicles, Performance Vehicles
