

Automotive Clutch Cover

This clutch cover is a critical component in automotive clutch systems. It is designed to apply pressure to the clutch disc, enabling the transfer of power from the engine to the transmission.

Product Overview

High-Performance Clutch Cover STC-076

The STC-076 clutch cover is a precision-engineered automotive component designed to facilitate reliable power transfer between the engine and the transmission. Constructed from high-strength steel, this durable unit is built to withstand the rigorous demands of the drivetrain environment. It integrates a pressure plate, diaphragm spring, and release levers to ensure smooth engagement and disengagement, promoting optimal vehicle performance and extended clutch system longevity.

Technical Specifications

Part Number	STC-076
Material	High-strength steel
Integrated Components	Pressure plate, Diaphragm spring, Release levers
Application	Automotive drivetrain
