

Automotive Coaxial Speaker

High-performance coaxial speaker designed for automotive audio systems. It features a robust construction with a durable cone material for enhanced sound reproduction.

Product Overview

High-Performance Automotive Audio

This automotive coaxial speaker is precision-engineered to deliver superior sound quality for mobile audio systems. It features a robust, durable construction designed to withstand the rigors of vehicle environments while maintaining consistent performance. With an integrated tweeter design, it provides clear, detailed high-frequency response, ensuring an immersive listening experience on the road.

Technical Specifications

Speaker Type	Coaxial
Primary Application	Automotive Audio Systems
Key Features	Integrated Tweeter, Durable Cone Material, Robust Construction, Secure Mounting
