

# Automotive Combinatory Lamp Assembly

This combinatory lamp assembly is a vehicle lighting component for automotive applications. The lamp assembly features four individual lamps mounted on a black metal bracket and includes wiring and connectors.

## Product Overview

### Automotive Combinatory Lamp Assembly

The Automotive Combinatory Lamp Assembly (WG9719720005&26) is a versatile vehicle lighting component designed for high-performance automotive applications. Featuring a robust configuration of four lamps mounted on a durable metal bracket, this assembly is engineered to provide superior illumination. It serves as an ideal solution for fog lights or auxiliary driving lights, ensuring reliable performance and easy integration into existing vehicle electrical systems.

## Technical Details

### Quality Grade

High-quality

### Part Number

WG9719720005&26

### Material Quality

Standard Material

## Design & Features

### Lamp Configuration

- Four individual lamps
- Two pairs arrangement
- Black metal bracket mounting

### Optical Features

Clear lens, Reflector optimized, High light output

## Installation

### Integration

Includes wiring and connectors for electrical system integration

### Recommended Usage

Fog lights, Auxiliary driving lights
