

Automotive Cooling Fan Assembly

Complete cooling fan assembly designed for automotive applications. Includes fan, motor, and shroud for efficient engine cooling.

Product Overview

High-Performance Cooling Fan Assembly

This complete automotive cooling fan assembly is engineered for reliable engine temperature management. The unit includes the fan, motor, and shroud, designed as a direct replacement to ensure seamless fitment and function. Built to meet or exceed OEM specifications, it features a multi-blade design for optimal airflow and a durable shroud for enhanced cooling efficiency.

Technical Specifications

Included Components

- Cooling Fan
- Electric Motor
- Shroud

Motor Performance

1 Quiet

Operational Noise Level

Key Features

Direct Replacement, OEM Specification Compliant, Multi-blade Design, Quiet Operation
