Overview

Professional Diagnostic Capabilities

This advanced diagnostic system represents the latest generation of equipment designed for comprehensive vehicle analysis. It supports both current and upcoming models, offering full diagnostic functionality including code reading, clearing, live data streaming, and computer programming. Built with robust, military-grade interface components, it ensures stable performance even under intensive workshop conditions.

Technical Specifications

Supported Protocols

- KL Diagnosis
- Three-line CAN BUS
- UDS Diagnostic Treaty

Supported Languages

- English
- German
- French
- Italian
- Spanish
- Portuguese
- Finnish
- Danish
- Swedish

Diagnostic Features

Code Reading, Code Clearing, Live Data Streaming, ECU Programming, Actuation Tests

Connection Methods

Wireless Diagnosis, LAN Cable

Package & Warranty

Warranty Coverage

Component	Guarantee Period
Main Unit	One Year
Cables	Six Months

Shipping Weight	5 KGS
