Product Overview

Professional ECU Tuning Interface

The MPPS chiptuning flasher is a high-performance tool designed for reading and writing memory from vehicle ECUs directly through the diagnostic connector. Featuring a robust aluminum enclosure, this tool supports a wide range of modern ECU systems including EDC16, EDC17, and MED9.x. It offers advanced functionality, including checksum correction and recovery modes, making it an essential solution for professional automotive chip tuning applications.

Technical Specifications

Hardware Build

Aluminum Enclosure • OBD Integrated Electronics • LED Status Indicators

Supported ECU Systems	EDC15, EDC16, EDC17, ME7.x, MED9.x, Siemens PPD1/x
Software Version	V3.0.27

Package Contents

Package Components

- SMPS MPPS Cable
- COM to OBD Cable
- USB Cable
- CD Driver
