

Automotive Engine Connecting Rod

High-performance connecting rod designed for automotive engines. It features precision-machined surfaces and optimized weight distribution for durability and optimal performance under high stress conditions.

Product Overview

High-Performance Engine Component

This automotive engine connecting rod is precision-engineered to withstand high-stress operating conditions, ensuring reliable engine function and longevity. Featuring robust construction and precision-machined surfaces, it is designed for optimal weight distribution and performance. The inclusion of a durable bronze bushing provides a smooth bearing surface for the piston pin, making it an essential component for demanding automotive engine applications.

Technical Specifications

OEM Number	ME012265
Compatibility	Mitsubishi 4D34, Mitsubishi 4DR4
HS Code	840999

Logistics & Ordering

Payment Terms

- T/T
- L/C

Shipping Methods

Vessel • Air

Minimum Order Quantity	50 PCS
Packaging	1 PC/polybag/box
