Product Overview

Automotive Engine Cooling Radiator

This high-performance engine cooling radiator is precision-engineered for optimal thermal management in demanding automotive applications. Featuring a durable core construction and optimized fin density, it ensures maximum heat dissipation and reliable operation. Designed for a direct fit, this unit provides long-lasting performance and consistent cooling efficiency for your vehicle.

Technical Specifications

Core Dimensions	640 x 468 mm
Header Plate Dimensions	65.7/65.7 x 497.5 mm

Compatibility

Transmission	AT
Vehicle Model	Mercedes-Benz CL-Class W215 CL500
Model Years	1999-Present

Cross Reference
