

# Automotive Engine Gasket

This automotive component is crafted for enhanced vehicle functionality and lasting durability. It ensures reliable performance and seamless integration with compatible vehicle systems.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Engine Gasket

The GTY-1002 is a premium automotive gasket designed for critical sealing applications in engine systems. Engineered to withstand high temperatures and extreme pressures, this component ensures a reliable, leak-proof seal between mating surfaces. Its robust construction makes it an ideal choice for professional technicians and automotive maintenance operations requiring long-term durability and seamless system integration.

## Technical Specifications

Model Number	GTY-1002
Thickness	0.5 mm
Primary Application	Engine Sealing, Mechanical Systems, Automotive Maintenance

## Performance Features

### Key Performance Indicators

**1 Grade**

High-Pressure Resistance

**1 Grade**

High-Temperature Tolerance
