

Automotive Engine Oil Filler Neck

This oil filler neck is designed for automotive engine applications. Its durable construction ensures long-lasting performance and resistance to corrosion.

Product Overview

Engine Oil Filler Neck Solution

This automotive engine oil filler neck is precision-engineered to ensure a secure, leak-proof seal for your engine's oil system. Designed for durability and resistance to corrosion, it provides a reliable solution for maintaining optimal engine oil levels. It is compatible with specific engine configurations, offering a robust replacement part for automotive maintenance needs.

Compatibility & Identification

Part Numbers	4134C005, 4142X098
Engine Compatibility	Perkins Engine

Product Details

Key Features

- Precision-engineered design
- Leak-proof fit
- Corrosion-resistant construction
- Durable build for long-lasting performance

Application	Automotive Engine
