Product Overview

High-Performance Automotive Engine Radiator

This automotive engine radiator is engineered to provide superior heat dissipation and efficient cooling for heavy-duty applications. Designed to meet or exceed OEM specifications, it ensures optimal fitment and long-lasting durability in demanding conditions. Its robust construction prevents overheating and helps maintain consistent engine temperatures for enhanced performance.

Compatibility

Compatible Model	FUSO Fighter
Compatible Engines	4D34, 6D16, 6D17
Production Years	1992-1999

Technical Specifications

Radiator Specifications

Parameter	Value
TS Number	72178
Core Size	570*598 mm
Mainboard Size	69/69*623.2 mm
OEM Reference	ME23975/ME298856
DPI Reference	72178
