Product Overview

Automotive Engine Rubber Hose

This automotive engine hose is engineered for reliable fluid or gas transfer within vehicle engine systems. Featuring a durable, curved, and molded rubber construction, it is designed to withstand the rigorous demands of high-temperature and high-pressure environments. Its specialized geometry ensures a secure fitment and connection, making it an essential component for critical engine routing applications.

Technical Specifications

Typical Applications

- Coolant routing
- Vacuum systems
- Oil transfer

Material Composition

High-durability automotive-grade rubber

Design Features

Molded Design, Curved Geometry, Variable Diameter Ends, Heat Resistant
