Product Overview

High-Performance Timing Belt 97MR25

The 97MR25 automotive timing belt is engineered for precise engine synchronization and reliable power transmission. Constructed from high-quality chloroprene rubber, this belt is designed to withstand the rigors of automotive engine environments, ensuring optimal efficiency. It offers a dependable service life, making it a suitable choice for maintaining engine performance and preventing component damage.

Technical Specifications

Model Number	97MR25
OE Reference Number	13568-39015
Material	Chloroprene rubber

Performance & Compatibility

Estimated Service Life

30000 KMS
Minimum Mileage

80000 KMS
Maximum Mileage

Compatible Applications	TOYOTA
