

Automotive Engine Wiring Harness

This automotive engine wiring harness is a comprehensive wiring solution designed for automotive engine management systems. It features a robust construction with corrugated tubing for protection against abrasion and environmental factors.

Product Overview

Automotive Engine Wiring Harness

The SGMW CN113R Series engine wiring harness is a high-performance solution engineered for reliable engine management systems. Designed with durable insulation and robust protection, it effectively safeguards critical electronic signals against abrasion and harsh under-hood environmental factors. This assembly is fully customizable to meet specific OEM requirements, ensuring precision fitment for complex engine bay configurations.

Technical Specifications

Insulation Material	PVC/Rubber/Customized
Connector Type	TYCO/Customized
Application	Electronic, Automotive Engine Management

Manufacturing & Quality

OEM Services

Customized Length • Large OEM Support • Small OEM Support

Quality Assurance

- 100% testing before delivery
- Visual drawing verification
