Product Overview

High-Performance Exhaust Upgrade

This automotive exhaust tailpipe is engineered to enhance both the aesthetics and functionality of vehicle exhaust systems. Featuring a durable stainless steel inner lining for corrosion resistance and a stylish carbon fiber outer layer, it provides improved heat resistance and a sporty look. The universal design ensures compatibility across a wide range of vehicle models, making it an ideal choice for performance upgrades.

Dimensions

Inlet Diameter (ID)	57 mm
Outlet Diameter (OD)	89 mm
Overall Length (OL)	160 mm

Technical Specifications

Available Finishes

Yellow Carbon Fiber • Green Carbon Fiber

Material Composition	#201 Stainless Steel, #304 Stainless Steel, Carbon Fiber
Vehicle Compatibility	Universal

Performance Metrics

Key Performance Benefits

- Enhanced exhaust flow
- Improved heat resistance
- Corrosion-resistant construction
- Secure slotted connection
