

Automotive Fan Speed Controller

This electronic module is designed for regulating fan speed in automotive applications. It uses sensor inputs to control the fan and maintain optimal engine temperature.

Product Overview

High-Performance Fan Control Module

This automotive fan speed controller is engineered to provide precise regulation of cooling systems, ensuring optimal engine temperature management. Designed for durability and efficient heat dissipation, the module features a robust metallic housing with integrated finned heatsinks. It serves as a reliable replacement component for maintaining vehicle performance and passenger comfort.

Technical Specifications

| | |
|----------------------|--------------------------------|
| OE Reference Numbers | 940.0041.07, 940004107 |
| Component Type | Fan Control Module / Regulator |

Compatibility

Compatible Vehicle Models

- Ford Mondeo
- Ford Galaxy
- Ford S-max
