

Automotive Fluid Filter

This cylindrical filter features a yellow body and a metallic silver end cap with a black rubber seal. It is designed for filtering fluids within a vehicle's system, ensuring optimal performance and longevity of engine components.

Product Overview

Automotive Fluid Filtration Solution

This high-performance automotive fluid filter is engineered to maintain the integrity of your vehicle's critical systems. It provides comprehensive cleaning capabilities for air, fuel, and oil, ensuring that contaminants are effectively removed before they can impact engine performance. By promoting cleaner fluid circulation, this component helps extend the operational lifespan of essential engine parts and maintains optimal vehicle efficiency.

Technical Specifications

Design Features

- Cylindrical housing
- Durable yellow body construction
- Reinforced metallic silver end cap
- Integrated central rubber seal for leak prevention

Application Areas

Air Filtration, Fuel Filtration, Oil Filtration
