

Automotive Fog Light Pair

This pair of fog lights is designed for automotive use. They enhance visibility in adverse weather conditions by projecting a wide beam of light.

Product Overview

Enhanced Automotive Visibility

The HY-301A fog light pair is engineered to provide superior illumination during adverse weather conditions, including heavy fog, rain, and snow. These lights utilize a precision clear lens paired with an advanced reflector design to project a wide, effective beam pattern. By improving road visibility, this set enhances driver safety and overall vehicle performance in low-light environments.

Technical Specifications

Model Number	HY-301A
Application	Automotive, Fog Light

Key Features

Visibility Performance

1 All-Weather
Weather Compatibility
