

Automotive Front Bumper with Fog Light Housings

This front bumper is designed for automotive use, featuring integrated fog light housings and a grille. It is constructed from durable material and provides impact protection while also allowing airflow to the radiator.

Product Overview

Front Bumper Integration

This automotive front bumper is engineered to provide essential impact protection for vehicle frames and occupants. Featuring integrated fog light housings and a dedicated airflow grille, it combines safety with aerodynamic efficiency. This component is an ideal solution for professional automotive repair and aftermarket vehicle restoration.

Physical Properties

Surface Finish

Unpainted • Primed

Material Composition

Primed plastic or fiberglass

Technical Features

Integrated Components

- Fog light housings
- Horizontal cooling grille
- Aerodynamic profile

Functional Highlights

1 Yes

Aerodynamic Optimization

1 Yes

Integrated Cooling Vents
