

Automotive Fuse Connector with Wires

Automotive fuse connector featuring three wires for electrical connection. It has a robust yellow housing and white interior, ensuring reliable performance and safety in vehicles.

Product Overview

Automotive Fuse Connector

This automotive fuse connector is designed to provide essential circuit protection for vehicle electrical systems. It acts as a safety wire component, preventing damage during current overload states. Featuring a robust housing and pre-wired configuration, it ensures reliable and secure electrical connections in automotive applications.

Physical Characteristics

Housing Color	Yellow
Interior Color	White

Wiring

Wire Configuration

- Black
- Blue
- White

Number of Wires	3
