Product Overview

Automotive Transmission Component

This automotive gearbox is designed for reliable power transmission in vehicle drivetrains. Engineered to adjust torque and speed effectively, it is compatible with specific engine types including the 4JB1. This unit serves as a critical mechanical component for transferring power from the engine to the wheels.

Technical Specifications

Key Features

- Metallic housing
- Splined input shaft
- Mechanical linkage gear selection

Compatible Engines	4JB1
Compatible Makes	Toyota, Isuzu
Transmission Type	Manual
