Product Overview

High-Performance Transmission Solutions

This robust automotive gearbox is engineered for durability, precision power transfer, and long-lasting performance. Designed to meet OEM quality standards, it ensures smooth gear changes across diverse driving conditions. We support an extensive range of models for Japanese, American, European, and South Korean vehicles, with capabilities for custom manufacturing based on technical drawings and samples.

Key Features

Performance Metrics

50 Types

Available Models

Quality & Compliance

OEM Quality Standard, Technical Drawing Compliance, Rigorous Durability

Compatibility

Vehicle Compatibility

- Toyota
- Isuzu
- Nissan
- Hyundai
- Ford
- Daihatsu

Service Capabilities

Logistics and Development

- Custom production from drawings
- Sample-based development
- Flexible logistics services
- Customized packaging options
