Automotive Glass Information Platform

This online platform allows users to search and retrieve information about automotive glass products. It supports searching by XYG code, size, NAGS code, or Euro code, and provides details such as car photos, glass photos, descriptions, and size information.

Overview

Streamlined Automotive Glass Procurement

This online information platform serves as a comprehensive digital catalog designed to simplify the procurement process for automotive glass. Users can efficiently search, query, and retrieve detailed parameters, technical specifications, and visual references for a vast array of car models. By centralizing critical data, the platform empowers professional buyers to make informed purchasing decisions with greater speed and accuracy.

System Capabilities

Available Data Outputs

- Vehicle imagery
- Glass product photography
- Detailed product descriptions
- Dimensional specifications

Supported Search Parameters	XYG Code, NAGS Code, Euro Code, Dimensions

Access Details

Optimizing Search Results

To achieve the most accurate results, utilize the wildcard character '%' when entering codes. For instance, searching with the format '%[Code]%' allows the system to effectively locate specific matches within the database, ensuring you find the exact glass model required for your inventory or repair needs.

Access Method	Web-based login portal
