

Automotive GPS Navigation System with Media Playback

This GPS navigation system features a high-resolution display and touchscreen interface. It supports various media formats including MP3, MPEG4, WMA, and JPEG via USB.

Overview

Advanced Automotive Navigation & Media Hub

This high-performance automotive GPS navigation system integrates advanced media playback and connectivity features into a single, user-friendly interface. Designed for seamless vehicle integration, it supports steering wheel controls and provides a comprehensive multimedia experience with AM/FM radio, USB support, and Bluetooth hands-free calling. With its high-resolution touchscreen and intuitive graphical interface, this system enhances both safety and entertainment for drivers and passengers alike.

Navigation & Interface

Navigation Capabilities

- Built-in GPS Navigation
- Voice Navigation Support
- Navigation while listening to music
- Touchscreen handwriting input

Interface Features

Touchscreen, Handwriting Input, Graphical User Interface, High-Resolution Display

Multimedia & Connectivity

Supported Media Formats

MP3 • MPEG4 • WMA • JPEG

Audio Features

36 stations

AM/FM Presets

Vehicle Integration

Vehicle Compatibility

- Original steering wheel control support
- Reverse camera support
- Automatic light-sensing
- Independent speaker volume control (Front/Rear/Left/Right)
