

Automotive Heater Core

High-performance heater core designed for efficient heat exchange in automotive HVAC systems. Constructed with durable aluminum fins and tubes for optimal thermal conductivity and resistance to corrosion.

Product Overview

High-Performance Heater Core

This automotive heater core is engineered for efficient heat exchange within vehicle HVAC systems. Constructed with durable aluminum fins and tubes, it ensures optimal thermal conductivity and resistance to corrosion. Designed for seamless integration, it features precise inlet and outlet connections to maintain reliable heating performance under diverse climate conditions.

Technical Specifications

| | |
|-----------------|-------------------|
| Core Dimensions | 163 x 159 x 42 mm |
| OEM Reference | HYUNDAI |
| DPI Number | 6270075 |
| Compatibility | Hyundai |

Construction

Material

Aluminum

Key Features

- High fin density for efficient heat exchange
- Dual inlet/outlet pipes with secure fittings
- Corrosion-resistant construction
