

Automotive HID Bulb

This high-intensity discharge (HID) bulb is designed for automotive headlights. It features a glass tube containing xenon gas and metal halide salts, producing a bright, white light.

Product Overview

High-Performance HID Lighting

This high-intensity discharge (HID) bulb is engineered to provide superior illumination for automotive headlights. By utilizing a specialized glass tube filled with xenon gas and metal halide salts, it generates a bright, white light that significantly enhances visibility and safety on the road. Designed for ease of use, the bulb features a standardized base with integrated electrical connectors for straightforward installation in various vehicle types.

Technical Specifications

Light Source	High-Intensity Discharge (HID)
Internal Components	Xenon Gas, Metal Halide Salts, Glass Tube

Compatibility & Usage

Primary Applications

- Automotive Headlights
- Cars
- Motorcycles
- General Vehicle Lighting

Installation

Installation Features

Standardized Base • Plug-and-Play Connectors
