

Automotive HID Replacement Bulb

This is an earphone and headphone. It provides a bright, energy-efficient light source for improved visibility while driving.

Product Overview

High-Performance Automotive Lighting

This high-intensity discharge (HID) lamp is engineered as a direct replacement bulb for automotive headlight systems. Designed to provide superior illumination compared to standard halogen bulbs, it offers a bright and energy-efficient light source. The construction features a durable clear glass enclosure with precision-engineered internal electrodes, ensuring reliable performance and enhanced visibility for safer driving conditions.

Technical Specifications

Lighting Technology	High-Intensity Discharge (HID)
Primary Application	Automotive Headlight Replacement
Key Features	Energy Efficient, High Visibility, Direct Replacement

Design & Construction

Base Material	Black Plastic
Enclosure Material	Clear Glass
