

# Automotive HID Xenon Headlight Ballast

This high-intensity discharge (HID) ballast is designed for automotive lighting systems. It supports 12V and 24V systems, delivering 35W at 85/42 VAC.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance HID Xenon Ballasts

These OEM-grade HID xenon ballasts are engineered to provide reliable, high-intensity lighting for automotive headlight systems. Designed for broad compatibility, they support a wide array of bulb types including D1S, D2S, D2R, D3S, and D4S configurations. Each unit features advanced electronic control to ensure stable power delivery and longevity, making them an ideal solution for professional automotive lighting upgrades and maintenance.

## Technical Specifications

### Model Specifications

Bulb Compatibility	Input Voltage	Output Power/Voltage
D1S / D3S	13.5 VDC	35W @ 85/42 VAC
D2S / D2R	12V / 24V	35W @ 85 VAC
D4S / D4R	12V / 24V	35W @ 45 VAC

Max Ignition Voltage	25000 V
Expected Lifespan	>3000 hours

## Compatibility & Standards

### Compliance Standards

DOT • CE

Supported Bulb Types	D1S, D2S, D2R, D3S, D3R, D4S, D4R
