

# Automotive Hood Hinge

This hood hinge connects the hood to a vehicle's chassis, enabling smooth opening and closing. It is made from durable materials to ensure alignment and secure locking, and is available for both the right and left sides of the vehicle.

## Product Overview

### Automotive Hood Hinge

This automotive hood hinge is engineered for reliable performance, connecting the vehicle hood to the chassis for smooth opening and closing. Constructed from durable materials, it is designed to withstand daily operational stress and environmental factors. The component ensures precise alignment and secure locking, providing safety and peace of mind for vehicle maintenance and repair professionals.

## Technical Identification

### Part Reference Numbers

Side	Reference 1	Reference 2
Right (R)	53410-26090	153410-AT191
Left (L)	53420-26090	153420-AT191

Model Number: YX-02-133

## Key Features

### Functional Benefits

- Smooth opening and closing operation
- Precise alignment for hood fitment
- Secure locking mechanism
- High durability for environmental resistance

Available Configurations: Right Side (R), Left Side (L)
