

Automotive HVAC Blower Fan

This blower fan is designed for automotive HVAC systems. It provides high-volume air movement with a balanced impeller for smooth, quiet operation and reliable temperature control.

Product Overview

High-Performance HVAC Blower

This dual centrifugal blower assembly is engineered for high-volume air movement within automotive HVAC systems. It features an integrated motor and housing designed for durability and efficient temperature control. The unit includes a balanced impeller to ensure smooth, quiet operation during extended service life.

Technical Specifications

Voltage	24 V
Rated Current	10.2 A
Turn Speed	3200 RPM
