

Automotive HVAC Heater Core

This high-performance heater core is designed for efficient heat transfer in automotive HVAC systems. It features durable construction with aluminum fins and brazed tubes for optimal thermal conductivity and resistance to corrosion.

Product Overview

High-Performance HVAC Heater Core

This automotive heater core is engineered for efficient heat transfer and reliable thermal performance in vehicle HVAC systems. Constructed with durable materials, it features brazed tubes and aluminum fins designed to optimize heat dissipation and ensure long-term resistance to corrosion. Built to meet or exceed original equipment specifications, this unit provides a precise fit and seamless integration with existing coolant systems.

Technical Specifications

Core Dimensions	179 x 161 x 26 mm
OEM Part Numbers	OK30C-61A10, OK72A61A10
DPI Number	77514

Compatibility

Vehicle Compatibility

Model	Model Years
KIA RIO Estate/Saloon	2000-2005
