

# Automotive Ignition Distributor Cap

The distributor cap distributes high voltage from the ignition coil to the correct spark plug. It is constructed from durable, heat-resistant plastic to ensure reliable spark distribution and optimal engine performance.

## Product Overview

### High-Performance Ignition Distributor Cap

This automotive ignition distributor cap is engineered for reliable spark distribution, ensuring optimal engine timing and performance. Constructed from durable, heat-resistant materials, it is designed to withstand high temperatures and vibrations typical of demanding automotive environments. It provides a secure and efficient connection for spark plug wires, contributing to smooth engine operation and improved fuel efficiency.

## Technical Details

### Key Features

- Heat-resistant construction
- Vibration-dampening design
- Precise terminal alignment
- Secure mounting base

Material Composition	Heat-resistant industrial plastic
Visible Part Identifiers	150707, 160325, 160-25
