Product Overview

High-Performance Automotive Intercooler

This high-performance intercooler is designed to efficiently cool compressed air from the turbocharger, significantly improving engine performance and combustion efficiency. By reducing intake air temperatures, it helps minimize the risk of engine knocking and enhances overall reliability. Engineered for precise fitment, this unit ensures seamless integration with your vehicle's existing cooling system for optimal heat transfer.

Compatibility

Compatible Model	Toyota Corolla
Engine Specification	1.2T
Model Years	2017-MT

Technical Specifications

Core Dimensions	675 * 356 mm
Water Tank Dimensions	31.5/31.5 * 368 mm

Identification

OEM Reference	16550-0Y060
Nissens Reference	56185
