

Automotive Internal Combustion Engine

This auto engine features a vertical exhaust pipe, an air filter assembly, and a complex arrangement of mechanical components. The engine block is constructed from cast metal, with attachments and fittings for fuel, oil, and cooling systems.

Overview

High-Performance Automotive Engine

This internal combustion engine is engineered for durability and consistent performance in automotive applications. Featuring a robust cast metal block construction, the unit is equipped with integrated fuel, oil, and cooling system fittings to ensure reliable operation. Its design emphasizes mechanical efficiency and structural integrity, making it a suitable choice for heavy-duty automotive integration.

Technical Specifications

Included Components

- Vertical exhaust pipe
- Air filter assembly
- Integrated fuel system fittings
- Oil system connections
- Cooling system attachments

Engine Type	Internal Combustion Engine
Block Material	Cast Metal
