

Automotive Lead-Acid Battery 12V

This lead-acid car battery is designed for reliable starting power and long-lasting performance. It features a robust construction with reinforced grids and a durable casing to withstand vibration and harsh conditions.

Overview

Reliable Automotive Power

This 12V lead-acid battery is engineered for consistent starting power and long-lasting performance in automotive applications. Featuring a robust construction with reinforced grids and a durable casing, it is built to withstand vibration and harsh operating conditions. This maintenance-free design ensures extended service life and reliable energy delivery for a variety of vehicle types.

Technical Specifications

Voltage	12 V
Model Designation	55D26R

Features

Maintenance Type	Maintenance-Free
Durability Features	Reinforced Grids, Vibration Resistant, Durable Casing
