Product Overview

High-Performance Automotive Battery

This maintenance-free lead-acid battery is engineered specifically for automotive applications, utilizing advanced calcium technology to deliver enhanced performance and durability. Designed to provide reliable starting power, it ensures consistent performance across a wide range of vehicle types. The unit is built to rigorous quality standards, making it a dependable choice for demanding automotive environments.

Technical Specifications

Technology	Calcium Maintenance-Free
Model Number	67113

Certifications

Quality Standards	ISO/TS16949:2009
-------------------	------------------

Features

Key Benefits

- Maintenance-free operation
- Enhanced durability via calcium technology
- Reliable starting power
- High-quality construction
