

Automotive Lead-Acid Battery

This lead-acid car battery provides reliable starting power for automotive applications. It features a durable plastic casing and terminal covers.

Product Overview

Reliable Automotive Power

This lead-acid automotive battery is engineered to provide dependable starting power and consistent auxiliary electrical support for a wide range of vehicles. Featuring a robust black plastic casing and integrated carrying handle, it is designed for both durability and ease of installation. Built to meet or exceed rigorous industry standards, this battery ensures long-term performance and reliability for demanding automotive applications.

Physical Characteristics

Casing Material	Durable black plastic
Handling Features	Integrated carrying handle, Protective terminal covers

Performance

Application	Automotive • Starting Power • Auxiliary Support
Standards Compliance	Yes
