

# Automotive Lead-Acid Battery Charger

This is a compact and portable battery charger suitable for automotive lead-acid batteries. It includes selectable charging rates, overload protection, and clear indicators for monitoring charging status.

## Overview

### Professional Battery Charging Solution

This compact and portable battery charger is engineered for automotive and various lead-acid battery applications. It features selectable charging rates and built-in overload protection to ensure safe and reliable operation. Designed for ease of use, the unit provides clear status indications to help maintain optimal battery health.

## Technical Specifications

Model Series	CA-4G/5G/6G
Compatible Battery Types	Lead-Acid, Automotive

## Features

### Key Features

- Compact and portable design
- Selectable charging rates
- Overload protection
- Clear charging status indication
