

Automotive Lead-Acid Battery

This is an automotive battery designed for starting vehicle engines. It is a lead-acid type battery with terminals for connecting to a vehicle's electrical system.

Product Overview

Reliable Automotive Power Solution

This automotive lead-acid battery is designed for consistent starting power and reliable performance in standard vehicle applications. Featuring a durable construction with clear fluid level indicators, it ensures easy maintenance and monitoring for long-term usage. It is engineered to meet standard 12V automotive requirements, making it a dependable choice for various passenger vehicle needs.

Technical Specifications

Rated Voltage	12 V
Rated Capacity	45 Ah
Model Identifier	6-QA-45

Maintenance & Safety

Maintenance Features

- Upper fluid level indicator
- Lower fluid level indicator
- Accessible cell caps

Maintenance Type

Accessible • Standard Maintenance
