Product Overview

Professional Automotive Light & Actuation Solution

This versatile component integrates a durable mounting bracket with an electromechanical solenoid actuator, designed for robust automotive and industrial environments. The system features a protective black housing and reliable wiring for secure, long-term operation. It serves as an essential accessory for applications requiring precise mechanism control and stable illumination support.

Technical Specifications

Design Features

- Protective black housing
- Integrated electrical wiring
- Cylindrical metal actuator body
- Reinforced mounting base

Construction Material

Durable Metal

Actuator Type

Electromechanical Solenoid

Mounting Style

Bracket Mounted

Primary Applications

Automotive, Industrial, Mechanism Control, Illumination Support
