

Automotive Mold Set for Wipers, Cowls, and Side Mirrors

Mold set designed for creating automotive parts such as wipers, cowls and side mirrors. Includes mold cavities and switch actuators for a complete tooling solution.

Product Overview

Precision Automotive Mold Solutions

This high-precision automotive mold set is engineered for the manufacturing of complex vehicle components, including wiper assemblies, cowl pieces, and side mirror housings. Designed with a focus on durability and dimensional accuracy, the molds support rigorous production standards required by global automotive manufacturers. Our technical team provides end-to-end support, ensuring that every mold meets the specific geometry and material flow requirements of your automotive parts.

Technical Standards

Process Management

- ERP System Integrated
- Standardized Process Management
- Internal Testing Center
- Continuous R&D Innovation

Certifications

ISO 9001:2008

Applications

Applicable Parts

- Wiper Components
- Cowl Pieces
- Side Mirror Housings
- Semiconductor Components
- IC Connectors
- Lead Frame Electrical Connections
- Motor Fixed Rotors

Manufacturing Capabilities

Mold Types Offered

- Plastic Injection Molds
- Die Casting Molds
- Precision Mold Spare Parts
