Product Overview

High-Performance Automotive Mud Guard

This automotive mud guard is engineered for durability and precise fitment on heavy-duty trucks. Manufactured using advanced injection molding techniques with high-quality fiber glass, it offers a robust solution for protecting vehicle bodies from road debris, mud, and water. Designed for professional use, this component ensures a seamless installation and long-lasting performance in demanding road environments.

Technical Specifications

Installation Features

- Perfect fitment design
- Pre-drilled mounting holes
- Integrated cable/hose routing opening

Surface Finish

Smooth • Matte

Material	Fiber Glass
Manufacturing Method	Injection Molding
Vehicle Compatibility	Trucks, Heavy-Duty Vehicles
