

Automotive Multi-Pin Connector Block with Fuse

This multi-pin connector block is designed for automotive applications. A blade fuse (10A) is integrated for circuit protection.

Product Overview

Automotive Electrical Connectivity Solution

This multi-pin connector block is engineered for reliable electrical distribution in automotive environments. It features an integrated 10A blade fuse for essential circuit protection, ensuring safety and durability. Designed for PCB mounting, this component facilitates seamless integration into complex electronic systems.

Technical Specifications

Rated Current

10 A

Rated Current

Connector Type	Multi-pin female receptacle block
Mounting Style	PCB Mount
Circuit Protection	Yes
Material	Durable Plastic, Automotive Grade
